FincraHQ

1, Adedeji Adekola street,
Lekki phase 1,
Lagos, Nigeria

Dear HR:

I am a tech-savvy candidate looking to flex my talents to identify new growth strategies for Fincra as a Junior Data Analyst. I graduated from Niger delta university with a bachelor's degree in economics, I spent the last two years developing my skills at United Bank for Africa, where I started off as a teller and was promoted twice to customer service representative and later as the team lead for cash transactions.

I have always been fascinated by numbers, and working in data analytics has been a long-term goal of mine. My career in the banking industry has taught me to think strategically about problems and identify solutions. I believe this experience has prepared me for a role as Fincra's Junior Data Analyst.

During the course of my learning;

- I have familiarized myself with pivot tables and VLOOKUP in excel
- I practiced using SQL to query tables in a database, made visualizations with R and Power BI and taken individual Python lessons on data cleaning.
- I also completed a case study; [how can a wellness technology company play it smart?](#) , analyzing smart device usage data in order to gain insights for better market strategy

I am thrilled at the opportunity to use these experiences to fuel data-driven decisions at Fincra, and I am keen to continue developing my skill set on the job. I am available for a Zoom call or in-person meeting to discuss how I can help Fincra with improving digital solutions for business performance through data.

Sincerely,

Fakrogha Nancy
